

Featured Project: Private House, Surrey

Stone Type: Limestone

At this private residence in Surrey, Stirling Stone undertook the complete design, supply and fixing service for this magnificent property. This amply demonstrates the company's ability to deliver large volume and complex masonry packages within a very tight building programme to the highest possible quality standards.

The classical detailing included heavy corbelling, decorative cornices and two fine porticos to the front and rear of the property. We also undertook internal flooring and staircases, as well as extensive hard landscaping works.
